Seed Bombs

What You’ll Need:

- Soil
- Water
- Dixie cup
- Clay
- Flower seeds
- Mixing bowl (will get dirty)

What to Do:

1) Place a chunk of clay in the mixing bowl
2) Add one Dixie cup of water to the clay and mix with your hands
3) Add several handfuls of soil and continue mixing until mixture is dark gray, thick, and easily manipulated
4) Add several handfuls of flower seeds to the bowl and continue mixing so that seeds are spread throughout
5) Separate the mixture into meatball-sized balls
6) Throw the seed bombs into your yard and wait for rain, or plant in a pot and water; then watch flowers grow!
